OLI AHAD CHOYON SOFTWARE ENGINEER

OPEN FOR WORK & NEW OPPORTUNITIES

CSE graduate and software engineer based in Dhaka, Bangladesh — building clean, reliable web applications with a strong passion for UI/UX design and crafting experiences people love to use.

ABOUT CHOYON

B.SC. IN COMPUTER SCIENCE & ENGINEERING

I'm Oli Ahad Choyon, a software engineer from Dhaka, Bangladesh. I recently completed my Bachelor's degree in Computer Science & Engineering, where I fell in love with two things: writing clean, well-structured code — and designing interfaces that feel effortless to use.

"CODE IS HOW I THINK, DESIGN IS HOWT CARE ABOUT THE PEOPLE USING IT."

ENGINEERING × UI/UX

Beyond the degree, I've invested deeply in UI/UX design — wireframing, prototyping in Figma, studying design systems and human-computer interaction. I enjoy living on the bridge between engineering and design, where products actually get built and refined.

UI/UX — WIREFRAMING & PROTOTYPING

BUILDING PROJECTS — DHAKA / BANGLADESH

Right now I'm sharpening my skills through personal and collaborative projects — full-stack web apps, APIs, and UI/UX case studies. I'm actively looking for new opportunities and teams where I can contribute, grow, and build software that matters. **Open for work — remote or on-site.**

EXPERTISE

SKILLS

LANGUAGES 01

- JavaScript / TypeScript
- Python
- Java
- C / C++
- SQL

FRONTEND 02

- React
- Next.js
- Tailwind CSS
- HTML5 & CSS3
- Responsive Design

BACKEND & TOOLS 03

- Node.js & Express
- PostgreSQL / MongoDB
- REST APIs
- Git & GitHub
- Linux & Docker basics

UI/UX DESIGN 04

- Figma
- Wireframing & Prototyping
- Design Systems
- User Research
- Interaction Design

SELECTED PROJECTS

PROJECTS

FULL-STACK WEB APP

E-Commerce Platform

A complete online store with product catalog, cart, checkout flow, and an admin dashboard for inventory and order management. Built with authentication, role-based access, and payment-ready architecture.

React · Node.js · Express · PostgreSQL

WEB APPLICATION

Task Management App

A Kanban-style productivity app with drag-and-drop boards, deadlines, labels, and team collaboration. Focused on a clean, distraction-free UI designed first in Figma.

Next.js · TypeScript · Tailwind CSS

FULL-STACK WEB APP

Real-Time Chat Application

Instant messaging with rooms, online presence indicators, and message history. Built on WebSockets with a React front end and a Node.js backend.

React · Socket.io · Node.js · MongoDB

ACADEMIC PROJECT

University Portal

A student information portal for course enrollment, grades, and schedules — my CSE capstone project. Includes an admin panel for faculty and a responsive student dashboard.

Java · MySQL · Figma

DESIGN PORTFOLIO

UI/UX Case Studies

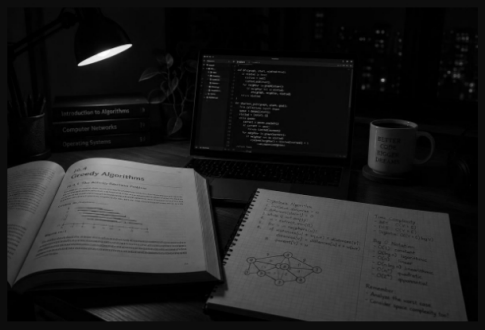

A collection of end-to-end design case studies — research, wireframes, prototypes, and final interfaces — exploring usability problems in everyday apps and redesigning them.

Figma · Prototyping · User Research

BACKGROUND

EDUCATION

DHAKA / BANGLADESH

B.Sc. in Computer Science & Engineering

Four years of algorithms, data structures, databases, operating systems, and software engineering — capped with a full-stack capstone project. This degree gave me the engineering fundamentals I use every day, and it's where my passion for building interfaces began.

COMPLETED — OPEN FOR OPPORTUNITIES

DESIGN SYSTEMS & PROTOTYPING

UI/UX Design — Focused Self-Study

Alongside my degree, I've pursued design through online courses, hands-on Figma practice, and redesign case studies. I study design systems, accessibility, and interaction patterns — because good engineering without good design is only half a product.
